

CAPITOL FLEXI-PAVE

Flexi-Pave is a porous, non-cracking, insulating, and flexible construction material that can be used for a variety of applications. This revolutionary product is environmentally friendly and composed in part from recycled waste tires. Flexi-Pave is mixed directly on the installation site and cures in just 24 hours. The result is extremely porous, heavy duty, and dynamic in its physical nature. It is designed for low speed applications with pedestrian and vehicular use, and bonds without trouble to adjacent construction materials. The pervious composition of Flexi-Pave also allows vast amounts of water to flow through making it the perfect solution for urban storm water management problems.

TRAINING FACILITIES

Benefits: Critical fall height protection and site maintenance reduction

- Climbing wall base
- Monkey bars base
- Rope climb base
- Pull-up station base
- Sit-up station
- Push-up station
- Train connecting various stations

FIRING RANGE

Benefits: Eliminates maintenance and absorbs rounds

- Foxhole floor and around perimeter
- Prone position station
- Diffusion strip between stations
- Targets
- Ballistic up to 7.62 AP at 12" depth

MOBILITY

Bases: Domestic and Outside USA, FOBs, Outposts:

- Floors
- Tent pads
- Shower floors
- Motor pools
- Vehicle wash racks
- Helipads
- Sidewalks
- Airport medians
- Airport taxiways
- Hesco barriers
- Walking paths
- Shoot house floors
- Barracks corridors
